EVOTEK is a group that have been operating in the hydraulic market since more than 25 years in Italy, China, USA and Czech Republic.

Main operations and business activities focus on the development, production and sales of hydraulic filters, elements and power units. We have developed and established complete product series of suction, pressure and return filters for mobile and stationary applications as well as lubrication systems for wind turbines.

In order to satisfy the needs of the customers, EVOTEK can provide components and filters customized for the specific application, according to the technical requirements of the clients.

Thanks to the cooperation between our chinese and european divisions, we combine european know-how and our location advantage of being based in China and Czech Republic.

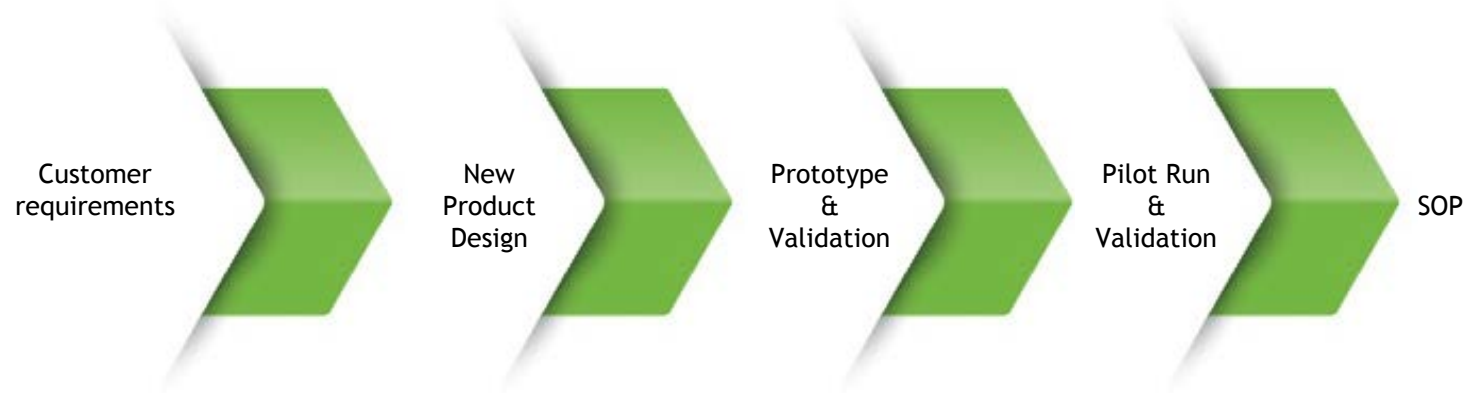

Currently our team consists in more than 150 employees operating in 4 countries.

Having established ourselves and continuously growing in the market with our current main business in the energy sector and some mobile applications, we are planning to increase our international market share. In line with our growth we are developing new strategies: more international distributors network with more presence into each domestic market.

How we operate

Customer oriented

- We also personalize products for specific applications, more suitable for the customers, in order to optimize the assembling with cost reduction.
- Our time to market is within 90 days

Certified factory
